HP Kiosk 55" FS - B2B

Indoor totem for two screens, mounted back-to-back

Item no.: 6455

The HP Kiosk 55" FS - B2B is a free standing indoor totem. It is suitable for two screens with a size of 55" / 140 cm, mounted back-to-back.

It is particularly suitable for placement e.g. as a digital doorman, information point or as a signpost system.

Screens with a maximum installation depth of 40 mm can be safely accommodated in the slim indoor totem.

The cables are routed internally and ensure a clean appearance.

The totem is lockable and offers space in the lower part for a mini PC or other A/V equipment that should be kept out of sight and protected from unauthorized access.
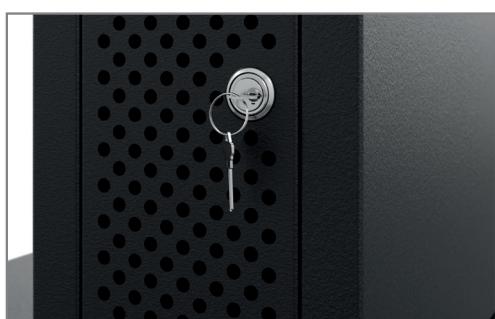

The ventilation openings in the upper and lower part of the totem ensure effective heat dissipation and thus prevent heat build up.

In the standard version the totem is anthracite gray (RAL 7016), but can be delivered in a RAL colour of your choice (from 5 pieces) for an additional charge and thus adapted to the environment or an existing corporate design.

Additional options also allow the totem to be individually adapted to the desired location.

Removable front cover for good service accessibility

Ventilation openings ensure effective heat dissipation

Optionally also in a RAL colour of your choice

BACK-to-BACK
