

Huddly and MAXHUB Meeting Room Collaboration

Boost meeting engagement and productivity with the powerful collaboration between Huddly and MAXHUB. Together, we deliver smarter, more inclusive meetings through future-proof solutions tailored for every room size—from huddle spaces to large conference rooms. Huddly's premium cameras leverage Edge AI to create intelligent meeting experiences, while MAXHUB's room

solutions ensure remote participants feel fully immersed with visually engaging, seamless operation. By integrating these technologies, you'll create an environment that fosters dynamic, human-centric collaboration, with solutions that adapt to your evolving needs.

 Certified for
Microsoft Teams

Solution benefits

Smarter meetings

- **Comprehensive room solutions**
A complete room solution that boosts engagement and includes everything needed for high-quality audio and video—no extra software, DSPs, or components required.
- **AI-powered video conferencing**
One-click instant access, intelligent sound targeting, and advanced AI features deliver high-quality, effective meetings.
- **Flexible solution**
Supports both single-camera and multi-camera configurations to capture more participants and conversations.

Empowering the human experience

- **User-focused design**
Purpose-built for seamless engagement and productivity, creating an intuitive experience for participants.
- **AI-directed meetings**
Autonomous meeting solutions deliver real-time editing and framing for maximum engagement without manual intervention.
- **Streamlined setup**
Plug-and-play functionality minimizes installation complexity for quicker deployment.

Evolving AI

- **Adaptive technology**
Responsive to user needs, ensuring all participants are heard and seen clearly.
- **Versatile room integration**
Supports any room layout, providing true full-room audio coverage, high-quality video conferencing and flexible meeting room solutions that fit into existing environments.
- **Future proof technology**
Regular software updates enhance device performance over time with the latest AI capabilities, without the need for new hardware.
