

CPS MOBILE STAND DUAL 75 - 86"

comPROnents[®] complete solution

Item no.: 3327

The CPS MOBILE STAND DUAL 75 - 86" is a mobile stand system for two screens with a screen diagonal between 75 - 86" | 191 - 218 cm, which can be placed side-by-side.

The VESA standard is used from min. 400 mm horizontally up to max. 900 mm and vertically from min. 400 mm up to max. 800 mm. The fixed VESA arms can be optionally secured with a padlock.

The castors allow to move the system flexibly and fix it securely with the locking brakes.

The rails are height-adjustable along the aluminium pillars and thus offer very flexible mounting options, adapted to the respective situation in the room.

Cables are routed along the rear side of the rails and pillars by means of cable clips and thus remain out of sight.

The surfaces of the components are protected by an impact and scratch resistant powder coating in black.

The maximum load per screen is 70 kg.

The complete solutions can be combined and extended with the components of the comPROnents[®] series without restriction and thus offer further application possibilities.
