

## CPS Elia 160 Floorstand

**comPROnents<sup>®</sup> complete solution**

**Item no.: 3340**

The CPS Elia 160 Floorstand is a freestanding stand system. Screens with a screen size between 46" - 65" | 117 - 165 cm find their place here and can be mounted either in landscape or portrait orientation.

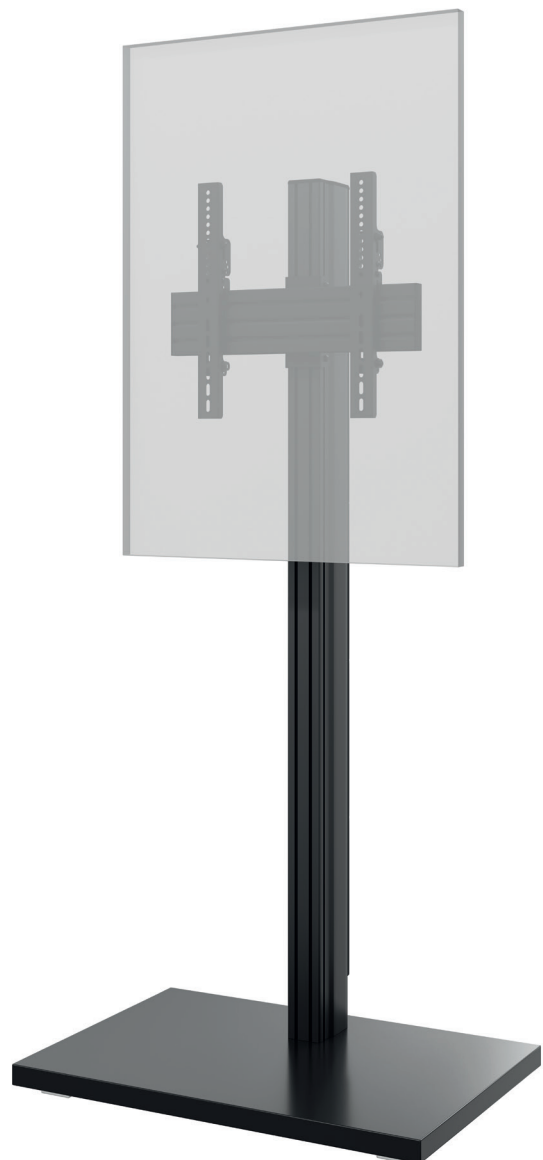

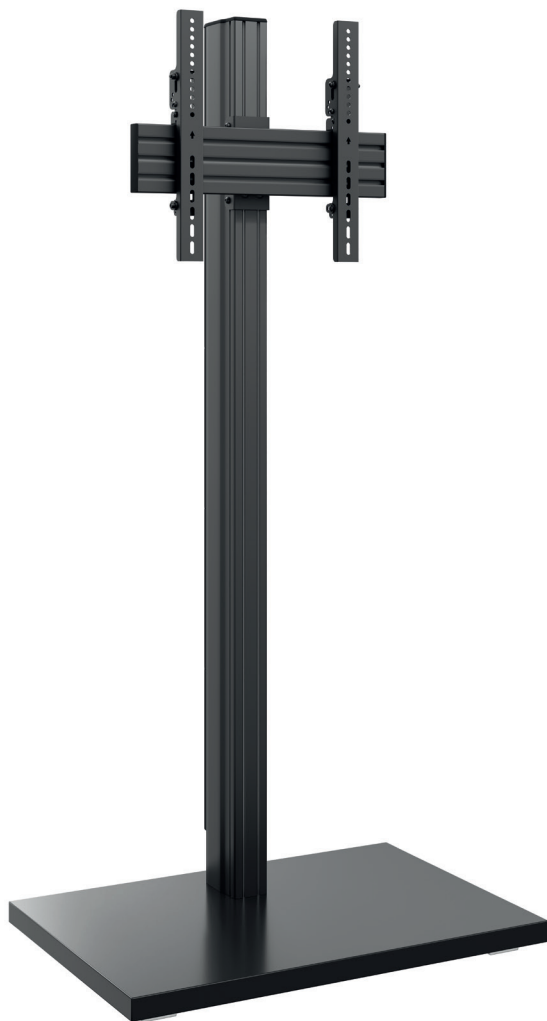

The VESA standard is covered from min. VESA 100 mm to max. VESA 400 mm. The VESA arms can be tilted from -5° up to +15° and can also be optionally secured with a lock.

The height of the rail can be adjusted along the aluminium pillars on the mounting side, thus offering flexible mounting options to suit the respective room situation or the installed screen.

Cables are routed along the rear of the rail and the column by means of cable clips and remain out of sight. The surfaces of the individual components are protected by an impact and scratch resistant powder coating in black. The MDF base plate, on the other hand, has a black high-gloss surface.

The maximum load of the system is 40 kg.

The complete solutions can be combined and extended with the individual components of the comPROnents<sup>®</sup> series without any restrictions and thus offer further application possibilities.
