BrackIT® Stand low tilt
Mobile display cart

Item no.: 8225

The BrackIT® Stand low tilt is a mobile display cart for screens with 32 - 55" | 81 - 140 cm screen diagonal.

A VESA universal mount up to a maximum of VESA 400 x 400 mm is included. The mount can be locked, if desired. The screen is mounted in landscape format.

The heigt of the system is 493 mm, but this only applies to screens with a centered hole pattern. In case of a decentralized VESA arrangement, a compensating adapter must be used, which you can find in our portfolio.
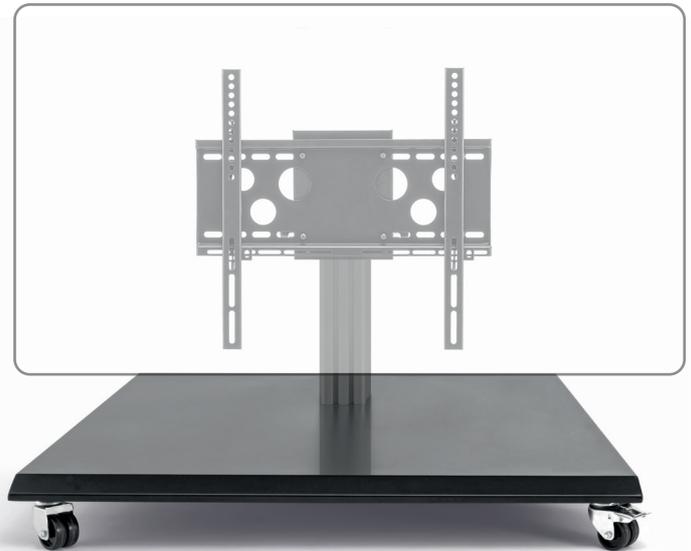

Thanks to the rotary handles on the side, the tilt angle of the screen can be continuously adjusted and fixed from 0 to 90° with tools.

The stable castors of the display cart are equipped with lock-type brakes and offer a safe stand at the desired location.

A cable cover on the back of the column keeps the cables neatly together and ensures a clean appearance.

The surfaces are finished with an impact- and scratch-resistant powder coating in black.

The maximum load is 30 kg.

cable clips on the back

continuously tiltable via rotary handle on the side
